

Previous number of parental deployments/year? _____

Any information that you feel is relevant regarding previous transitions. (E.g. challenges, favourite subjects, sports, music)

Any expected future parental absences that may impact the family? (Please note, we have an active casserole bank which often provides a little respite for families undergoing challenges, as well as activities to assist students to connect to the absent family member.)

Which area do you live in and how will you be getting to school? (Bus timetables and information are available and many of our students commute to school this way. Where possible we can put your student in touch with other ADF students who catch buses in the same area. Others may wish to car pool. Again, where possible we can send out expressions of interest to others in the same area.)

Bremer State High School is proud to offer varied transition sessions, where new and existing students have the opportunity to participate in team building exercises and 'getting to know you' exercises. These sessions assist students to connect with peers from previous schools and/or simply gain an appreciation that they are not the only people that have had to move. Others enjoy networking with students from a similar background to themselves, or just taking a break from mastering a new environment. Transition information and support has also been shown to assist in times of parental absence and with navigation of the teenage years. We are very proud at Bremer of our contribution to the School Community and our aim is to encourage all students to pursue the things that interest them in order to thrive and become involved in the school and wider community.

These support options are offered to all Defence Students. Should you not wish your student to engage in any of these programs please indicate this here.
